

Metaris Inc, Piston pumps.

Sigma Hydraulics directly imports a range of single MA10V pressure compensated piston pumps in the following capacities. With or without “through drives”.

18cc
28cc
45cc
71cc
100cc

A variety of combined “Tandem” pumps can be assembled from existing stock and Sigma Hydraulics has further access to the complete range of Metaris Inc units and spares at reasonable lead times. MA10V parts are directly interchangeable with A10V.

Sigma Hydraulics is constantly expanding our available range of Metaris Inc items. Please [contact](#) our sales team for more information, with details on your application.
